Database

[MySQL](#) · [SQL](#)

Tools

[Git/GitHub](#) · [VS Code](#) · XAMPP · Composer · npm/Vite · Postman

Other

[Microsoft 365](#) · [Tally](#) · Basic Accounting · Documentation

— WORK EXPERIENCE

Backend Java Intern **INTERNSHIP**

F1Soft International Pvt. Ltd. - Kathmandu

- ▶ Gained practical exposure to Java backend development, application testing, and professional software workflows.
- ▶ Practiced OOP concepts, database integration basics, debugging, teamwork, and disciplined development habits.

Laravel & Web Developer **PROJECT-BASED**

Project-based development - Laravel, Tailwind CSS, MySQL, Git

- ▶ Built and improved dynamic Laravel websites with admin dashboards, CRUD modules, media uploads, authentication, booking flows, and SEO-friendly content sections.
- ▶ Handled responsive Blade views, Tailwind UI polishing, Vite/npm setup, and Git branch workflows.

— CURRENT PROJECT

Java E-Commerce System **IN PROGRESS**

[Java](#) · [Spring Boot Basics](#) · [MySQL](#) · [REST API](#)

- ▶ Developing an e-commerce backend to practice product management, cart/order flow, user authentication, and database-driven CRUD.
- ▶ Focused on strengthening Java backend concepts, clean service/controller structure, and API-based development.

— SELECTED PROJECTS

Sayumi Global / Sayumi Travels

Laravel · Tailwind CSS · MySQL · Git

- ▶ Full-featured travel platform with dynamic packages, destinations, bookings, banners, reviews, and FAQ/SEO schema support.
- ▶ Improved admin/frontend UI, filters, upload previews, route/controller logic, and reusable page settings.

ConvertTree - Online Utility Tools Platform

Laravel · MySQL · Tailwind CSS

- ▶ Tools website covering PDF, image, email, video/audio utilities, QR code generation, and admin-managed ad placements.

News Portal - Role-Based Multi-Author System

Laravel · MySQL · Tailwind CSS

- ▶ Role-based portal where admin assigns categories and authors publish only within their assigned categories.

Electro Emporium - Gadget E-Commerce

PHP · MySQL · JavaScript · HTML/CSS

- ▶ Built login/registration, product pages, cart popup, Swiper hero section, and MySQL-backed user authentication.
